Letter of Recommendation

Hello Mr. Ulli Koebe,

As you know, my business-music-website is very complex, technical and sophisticated. It is an essential part of my business and a global working communication platform.

After noticing my website loaded slowly, I have really appreciated that you and Christian Webster came to the rescue, and have optimized and approved in a very short time my website. It is organized now in a much better and more responsive way. And as a result, the loading time of my big size template is much faster. Seconds are long in the computer world, and I don't want my fans distracted or detracted by a less than an optimum and modern website.

As I insist that my business runs smooth and as close to really perfect as possible, I am very grateful for your fast service and focused consulting. I'd highly recommend you to others as it was a great idea of yours to do professional business together.

It was a wonderful experience to have this support and consultation with you. I'm very, very pleased.

Many thanks,

Melanie Dekker
